# Fed Submit™ (OPM)

Overview

Mentalix's Fed Submit (OPM) product is used by contractors and government agencies that are mandated or permitted to submit background checks to OPM. Electronic fingerprint capture (and submission, where permitted) can result in significant time and cost savings for agencies that previously mailed ten-print inked cards for identity verification. Fed Submit's adaptability, scalability and affordability make it work for organizations of any size.

Benefits

- Eliminates the mess of ink capture and reduces errors.

- Increases speed of capture and submission process.

- Low cost makes it affordable for even small-volume needs or for placing units at multiple sites.

- Streamlines transaction administration, featuring fingerprint acquisition, submission and tracking.

- Can be expanded or scaled down to accommodate a single-site operation or a multi-office organization.

- Works with off-the-shelf hardware rather than costly special equipment.

- Straightforward – does not require extensive training.

- Designed for background checks, software includes standard NIST fields – no specialization is needed.

Fed Submit (OPM) allows you to capture fingerprints with a live scanner and/or to convert inked cards to electronic format. The software performs image quality and sequence checks on the fingerprint images prior to printing or submitting transactions – greatly reducing errors and processing time.

Features

- FBI-certified live scan & card scan support

- Fingerprint capture software

- 500 ppi FBI certification

- FBI-certified WSQ Version 3.1 compression

- FBI-certified card printing on blank card stock with add-on

- EBTS formatting

- Fingerprint quality check

- Fingerprint sequence checks (with live scan)

- Stores 70,000+ transactions

- Transaction reports

- Full text search capability

- Supports submission of transactions via SMTP using customer-supplied dial-up connection

- Customized data entry & field checks specific to applicant card requirements

- Electronic submissions accepted by OPM

- Context-specific field image display during data entry (with card scan)

- Live scan and card scan systems available

Flexibility

Fed Submit (OPM) can be configured to meet the needs of both large and small organizations. With options for add-ons and multiple stations, Fed Submit (OPM) can also accommodate a variety of needs, from card scanning to live scanning to electronic submissions.
