

Law Enforcement In-House Personnel Background Checks

In this issue:

- Background Checks
- New Headquarters
- Training Conference
- Scanning Services
- 2017 Conference List
- Contact Information

Mentalix is a leader in providing live scan systems for in-house background checks of law enforcement personnel. TXDPS authorized this capability last year and Mentalix is actively working with TXDPS to add new sites each month that enable these checks. It is no longer necessary to send applicants offsite to complete this work. Mentalix supports this functionality on its criminal stations, but also offers low cost systems specifically for applicant background checking and/or the newly TXDPS enabled in-house SOR submissions.

Mentalix SORLE stations (supporting Sex Offender Registration and Law Enforcement applicant checks) can be purchased as standalone systems regardless of whether a customer currently has a Mentalix live scan system, a competitor live scan system or no current live scan system. If you are considering the purchase of a criminal live scan station, make sure it includes support for law enforcement applicant and SOR submissions like Mentalix Fed Submit criminal ten print and palm print live scan systems. And, if you have a competitor criminal system that does not offer this capability or you don't have need for a full criminal system or if you just don't want to add this capability to your heavily-used criminal system, consider adding a low cost Mentalix SORLE system to take advantage of this new and efficient capability.

Mentalix Moves Up to New Headquarters

Mentalix has moved its headquarters! Our new mailing address and main corporate contact location address is in the Dominion Plaza West office building:

**17304 Preston Road
Suite 635
Dallas, TX 75252**

After a fond 8+ years at our nearby Plano address, Mentalix has signed a 5+ year lease at our new office location. Among the many improved location benefits is the shared use of a large conference center on property that Mentalix intends to use for training, demonstration and other corporate events. We are happy to be settled into our new location and we expect changes in infrastructure that we have made as part of our move will provide a significant long term benefit to Mentalix and its customers.

New! - Mentalix Conference Center Training for Maintenance Customers

Mentalix is now offering quarterly training sessions at its onsite conference center. These training sessions are offered for an extended introductory period as a no cost benefit to current maintenance customers. There will be a very limited number of slots available at each session, so it will be practical for one-on-one training in operating technique and so training content can be focus to the specific needs of attendees.

These training sessions are meant to especially assist with customer staff turnover and limited budgets that would otherwise prevent a customer from purchasing additional Mentalix onsite training at their site. Customers are encouraged to use this as a refresher tool, especially to - train the trainer at your customer site - so more customers can benefit from each session.

Mentalix believes in investing to make its customers successful, so we are excited to launch this new endeavor. We look forward to putting faces with the names of future attendees and don't be surprised if our support and/or sales staff stop by with free drinks and snacks in an effort to give you a warm welcome! Contact support@mentalix.com for more information on times and dates if you would like to take advantage of this opportunity!

Mentalix Fingerprint Card and Document Scanning Services

You may be familiar with Mentalix as a live scan vendor, but you may not be aware that Mentalix is also a recognized industry leader in the digitization of fingerprint hard cards. Mentalix has experience and expertise in converting many millions of fingerprint cards from difficult to fully utilize old-fashioned hard cards in space consuming storage cabinets / buildings / etc. to the very accessible, easily storable and highly usable standard electronic format that enables modern searching and matching of fingerprint data.

Mentalix has completed many large contract jobs (multi 100k to multi million units) directly with numerous states including Texas and large cities across the country. We are the experts in this business and we provide this capability for the big players as well as directly to large customers with our primary services offered exclusively through our secured card conversion center in Plano, Texas. Update the accessibility of your old stores of cards that you do not have in electronic format to online where you can readily use them and you can further move any bulky card stores in your current prime space to more offline and less costly storage areas.

Mentalix offers full service option such as secure two-way shipping, barcoding of cards, flexibility in certified fingerprint card formats, imaging of non-cards and data entry. Additionally, Mentalix also offers document scanning services for documents accompanying fingerprint cards or for jobs that only include documents.

Mentalix has a secure facility with highly structured controls in place to ensure security, accuracy and efficiency of card conversion jobs. Mentalix especially caters to and focuses on the scanning needs of law enforcement and the criminal justice community. Contact Mentalix Sales (info@mentalix.com) for more information on these ser-
