Mentalix Fed Submit™ Mugshot (Add-On)

The Fed Submit Mugshot (Add-On) is an innovative, cost effective way to integrate facial recognition software and DPS photographic submissions into your current Mentalix Fed Submit system. Capture fingerprints and store important visual data including mug shots, tattoos, and identifying marks all in one place to increase identification accuracy, processing efficiency, and ease of reference.

Fed Submit's facial recognition capabilities can be accessed and utilized with both Mentalix's Release Verification and Remote ID products, making processing efficient, secure, and most importantly, accurate.

Fed Submit Mugshot (Add-On) Features:

Enables Fed Submit photo features and DPS photo submissions, even with third party mugshot systems and hardware

Crystal clear 18-megapixel DSLR camera

Camera to Fed Submit dashboard integration

Comprehensive mug shot compilation space (front, two profiles, and a side view)

Large optional gallery for specific scars, identifying marks, and tattoos

Fed Submit facial recognition software compatible

Adult & Juvenile submissions

Intuitive user interface and help guides

Adjustable camera mount seamlessly integrates with current Mentalix systems

Optional photo importation

Why Upgrade?

- Streamline processing with a single, front to back system, all in one convenient place.

- Locating the correct transaction has never been easier, increasing efficiency and reducing operator error with visual cues.

- Additional modes of identification improves accuracy of matches on a local and federal level.

- Integrating photo capture with fingerprinting allows identifying information to be stored in single transaction record for easy reference, transfer, and storage.

- Low investment with a high return on functionality, usability, and efficiency.

- The Mugshot (Add-On) can be used to expand the features of not only the Fed Submit system, but also the Release Verification, and Remote ID products as well.

- Advancements in facial recognition software and stricter identification laws makes the ability to capture and catalog high quality images invaluable.

- Submitting photographic information alongside fingerprints just makes sense. For accuracy, for building state and federal facial archives, and for moving forward into the future.

Texas Customers

The TxDPS now requires that all agencies include a mug shot photo with all SOR and Law Enforcement Applicant submissions, in keeping with criminal transaction requirements in other states, and a governmental push toward IAFIS facial matching.
