Designated local storage space for 70,000+ transactions

Transaction reports

High quality photo/mug shot capture

Instant fingerprint quality check and scoring

Intuitive user interface and help guides

The **Fed Submit (SORLE) Live Scan Pack** is a standalone live scan system specifically designed for law enforcement agencies to create and process sex offender registrations and law enforcement applicant transactions all from one convenient, in-house system. Easily complete required biometric transactions, capture high quality photos, and electronically submit to your DPS to receive transaction results in minutes, all without the months of waiting and weeks of scheduling through outside agencies. Mentalix makes your workforce management work for you.

Why Upgrade?

- Electronic submission reduces background investigation time for Law Enforcement Applicants.
- In-house systems expedite mandatory registration of sex offenders.
- Text based searching and visual cues increases efficiency in locating past transactions and reduces operator error.
- Real time fingerprint quality checks substantially decrease rejected submissions and error rates .
- Integrating photo capture with fingerprinting allows identifying information to be stored in single transaction record for easy reference, transfer, and storage in compliance with increased applicant legislation.
- Low investment with a high return on functionality, usability, and efficiency.
- A separate applicant station frees up criminal live scan stations to better support high volume demands.
- In-house applicant systems allow for significantly faster DPS response times and flexible scheduling for applicants.

Texas Customers

The TxDPS now requires that all agencies include a mug shot photo with all SOR and Law Enforcement Applicant submissions in keeping with criminal transaction requirements in other states, and a governmental push toward IAFIS facial matching.
