Mentalix Demonstrates Updated ADF R3 Feeder at IAI

Mentalix demonstrated its updated high-volume solution for certified fingerprint card scanning in early August at the Annual IAI International Forensic Education Conference in Atlanta, Georgia. The latest device improvements include a protective plexiglass containment unit fully surrounding the device to minimize sound, provide a safety barrier around moving components and a protective envelope to reduce dust and air flow interference. The result is a device that is now much more friendly and operational in a normal office environment.

The device is used within Mentalix card conversion center, but it is also made available for purchase by integrators and end users. In addition to being the only practical feeder-based solution available for volume certified fingerprint card scanning, the device offers superior card handling care and flexibility in handling aged materials that no other device offers. Mentalix has several patents pending on the device and its unique technology.

Updates to FSCP Card Scan Products Coming Soon!

Mentalix is working on significant re-design improvements to its FSCP card conversion and data entry software products.

Improvements will include a more flexible interface for data entry to better suit custom card conversion needs. The new improvements will make it easier to take advantage of the ADF R3 as a card conversion option.

ADF R3 Feeder Lease Program

Mentalix will be introducing a lease program option for its ADF R3 high volume scan units. The lease program offers an automatically renewing quarterly lease option that will eliminate the large upfront cost and therefore the significant approval and time delay in getting Mentalix card conversion solution up and running at new customer sites.

The system as a service model has been requested by multiple customers as a desirable option and we are committed to putting this option in place.

Mentalix Completes Large Northeastern City Card Conversion Job

Mentalix recently completed a large city-level conversion project phase one that included a total of over 400,000 cards processed. Several states and other agencies have relied on Mentalix to process (in total) tens of millions of fingerprint cards. Mentalix works with states directly and also partners with AFIS vendors to provide card conversion services. Mentalix provides round-trip assistance in the conversion process, providing shipping containers and packing materials to customer site, and coordinating shipping to/from Mentalix card conversion facility.

Mentalix inventories cards, barcodes cards, provides certified fingerprint and palm print card scanning, fulfills customer data entry needs, and reviews/validates all conversion work. All labor is performed in a secured facility with background checked employees in a Mentalix U.S. location. Complete and regular updated reports are provided to our customers on the progress of the conversion jobs and extensive reports are provided when electronic data is delivered to the customer.

Mentalix New Headquarters

Mentalix has moved its headquarters! Our new mailing address and main corporate contact location address is in the Dominion Plaza West office building:

17304 Preston Road, Suite 635. Dallas, TX 75252

After a fond 8+ years at our old address, Mentalix has signed a 5+ year lease at our new office location. Among the many improved location benefits is the shared use of a large conference center on property that Mentalix intends to use for training, demonstration and other corporate events. We are happy to be settled into our new location and we expect changes in location and infrastructure that we are making as part of our move will provide a significant long term benefit to Mentalix and its customers. Stay tuned for upcoming announcements, especially on use of our new onsite conference center.

Mentalix Completes Criminal and Civil Certification for Mississippi

Mentalix recently announced its successful certification of its live scan / palm scan system for criminal and civil submissions to the Mississippi Criminal History System. Mentalix successfully completed a comprehensive and rigorous multi-day test process in Jackson, MS, to complete the certification requirements.

We look forward to a long and successful future in working with law enforcement and civilian agencies in Mississippi and bringing our established products to this newly certified territory for Mentalix.

Mentalix Card conversion services

Mentalix is the vendor of choice for digitizing fingerprint cards for subsequent use in archive and AFIS systems. Mentalix continues to invest in expertise and resources needed to meet the diverse requirements of large conversion jobs. Mentalix has a secure facility with highly structured controls in place to ensure security, accuracy and efficiency of card conversion jobs. Mentalix provides equipment and complete solutions to customers to perform their own conversions, but Mentalix card conversion service should always be considered as an option for all customer jobs.

Mentalix has had extensive experience and focus on card conversion for many years and projects, and this in turn provides our customers an enormous benefit when using our card conversion services.
