Clarksburg, WV 26306

March 7, 2002

Mr. Dale Remmers
Mentalix, Inc.
Suite 110
1700 Alma Drive
Plano, TX 75075

Dear Mr. Remmers:

The FBI's Criminal Justice Information Services (CJIS) Division has completed a review of the testing information submitted by Mentalix, Inc. for certification of the Mentalix-Configured Epson *Perfection 1640SU* Fingerprint Card Scan System, 500 pixels per inch (ppi), for Windows-32 computer operating system. The review of the test data was conducted by representatives of the FBI and the MITRE Corporation located in Bedford, Massachusetts.

Based on the results of this review, the FBI certifies that the Mentalix-Configured Epson *Perfection 1640SU* Fingerprint Card Scan System, 500ppi, for Windows-32 computer operating system, is in compliance with the Integrated Automated Fingerprint Identification System (IAFIS) Image Quality Specifications (IQS) Appendix F Scanner Specifications created by the FBI's CJIS Division. The certification process does not endorse one product over any other product. Certification only demonstrates that this product meets the FBI standards.

Continued acceptance of the images created by an installed system, for retention in the FBI Master Fingerprint files, is contingent on the ability of the product to meet the

IQS over time. As equipment can degrade over time, the FBI recommends that your company assist customers for your products in the establishment of quality assurance programs and appropriate maintenance schedules.

Please direct any questions regarding this certification to Mr. Thomas E. Hopper, Programs Development Section. Mr. Hopper may be contacted via telephone at (202) 324-3506.

Sincerely,

Thomas E. Bush, III
Section Chief
Program Development Section
Criminal Justice Information
Services Division
