Dear Mr. Remmers:

The Federal Bureau of Investigation (FBI) Criminal Justice Information Services (CJIS) Division has completed a review of the testing information submitted by Mentalix, Inc. for certification of the Mentalix-Configured Umax *PowerLook III* Fingerprint Card Scanner *with Mentalix Fingerprint Scan API Toolkit*, Version 3.3, running on HP-UX-11 operating system (Hewlett-Packard's Unix operating System), 500/1000 pixels per inch. This configuration which does not include an automatic document feeder, is in compliance with the Appendix F of the FBI Integrated Automated Fingerprint Identification System (IAFIS) Image Quality Specifications (IQS) standards. The review of the test data was conducted by representatives of the FBI and the MITRE Corporation located in Bedford, Massachusetts.

Based on the results of this review, the FBI is certifying that the Mentalix-Configured Umax *PowerLook III* Fingerprint Card Scanner, *with Mentalix Fingerprint Scan API Toolkit*, Version 3.3, running on HP-UX-11, computer operating system, is in compliance with the IAFIS IQS Appendix F Scanner Specifications created by the FBI CJIS Division. The certification process does not endorse one product over any other product. Certification only demonstrates that this product meets the FBI standards.

Continued acceptance of the images created by an installed system, for retention in the FBI Master Fingerprint files, is contingent on the ability of the product to meet the

IQS over time. As equipment can degrade over time, the FBI recommends that your company assist customers for your products in the establishment of quality assurance programs and appropriate maintenance schedules.

Please direct any questions regarding this certification to Mr. Thomas E. Hopper, Programs Development Section, via telephone at (202) 324-3506.

Sincerely,

Thomas C. Bush, III/KKS
